

Lab Program 9: Multithread

```

class NewThread implements Runnable
{
    private String name;
    private int interval;
    private Thread t;
    NewThread (String threadname, int interval)
    {
        this.name = threadname;
        this.interval = interval;
        t = new Thread (this, name);
        t.start();
    }
    public void run()
    {
        try {
            for (int i = 5; i > 0; i--)
            {
                System.out.println (i + ":thread -->" + this.name);
                Thread.sleep (this.interval);
            }
        }
        catch (InterruptedException e) {
            System.out.println (name + " interrupted");
        }
    }
    public static void main (String args [])
    {
        new NewThread ("BMS College of Engineering", 10000);
        new NewThread ("CSE", 2000);
    }
}

```
